Quarterly Newsletter

Jul-Sep 09

Triad continues display its strength within the Distribution segment of the Oil industry, by continue to focus on its mission of *“Providing Complete Systems Engineering Solutions”*.

With growth of over 100% in 2008, Triad’s scope of work and capabilities continue to expand. Now offering services within the Bulk Plant industry, complete Electrical and Control Systems design and expansion into Pipeline PLC, Triad continues to demonstrate how integration combined with knowledge and commitment builds efficiency, reduces cost and maintains synergy within the project.

Our goal is to continue expanding into those areas surrounding the Distribution segment and offering turn key solutions to our customers.

Adjacent are a of few of the projects we completed in 3rd quarter of 09.

- Joins forces with a Bulk Plant software vendor and works with an existing hardware partner to begin the work of a complete Bulk Plant upgrade

- Completes three ethanol offload projects to include Design, Terminal Automation programming & configuration, PLC programming with HMI and Load Control programming combined with complete startup services.

- Completes thirteen Terminal Automation software upgrades; all completed with the time allotted and to the Customer’s expectation.

- Completes various Ethanol upgrade projects to include Design, Terminal Automation programming & configuration, PLC programming with HMI and Load Control programming combined with complete startup services.

- Contacted and immediately deployed to assist with a problem related to PLC communications to the Terminal Automation system in order to keep product supply to the Load Rack. Triad completes the task immediately upon arrival onsite; Customer states work was completed above expectation.
